

The background of the slide features a blue-tinted industrial factory scene with various pipes, tanks, and machinery. This scene is viewed through a grid of white, three-dimensional hexagonal shapes that appear to be breaking through a dark surface. The overall aesthetic is modern and technological.

Embedded Intelligence

# Our Services

---

- ❖ Design to budgetary requirement
- ❖ Client /team design review
- ❖ Component selection & procurement
- ❖ Porting of operating system and application software
- ❖ Prototyping & product development
- ❖ Field trial support
- ❖ Assembly, configuration and test
- ❖ Acceptance testing for production 'pass-off'
- ❖ Mass production

# Design & Production

---

- ❖ Design for Manufacture
- ❖ Product & system development for concept, prototyping and mass production
- ❖ System test, soak test & environmental cycling
- ❖ Incorporation of client specific testing procedures
- ❖ Flexibility of manufacturing services against client schedules and forecasts

# Materials & Quality Management

---

- ❖ Component selection, supplier liaison and procurement
- ❖ Free issue parts management
- ❖ Supplier performance management
- ❖ Goods-in quality control
  - batch and 100% inspection programs as required
- ❖ ISO9001:2008 accreditation

# Logistics Management

---

- ❖ Established 'trace & track' systems in place
- ❖ Negotiated courier delivery programs
- ❖ Client specific labelling for identification & tracking
- ❖ Customised packaging and labelling

# Support Services

---

- ❖ Repair via easy to use on-line RMA services
- ❖ Designated point of contact for technical, production & quality / corrective action liaison
- ❖ Managed service programs for:-
  - End Of Life (EOL)
  - Last Time Buy (LTB)
  - Last Time Shipment (LTS)
- ❖ Specific spare parts holding programs

# Our Team...

---

- ❖ Always possess a “*can do*” attitude
- ❖ Are flexible for your needs – not our own
- ❖ Are motivated and always ready to help
