

2019 Edition

# Innodisk Selection Guide

Flash Storage, DRAM Modules, Embedded Peripherals,  
and Software Solutions

**innodisk**

**Innodisk** is a service-driven provider of flash memory, DRAM modules, embedded peripherals and software solutions for industrial and enterprise applications. With satisfied customers across the embedded, server, in-vehicle, cloud storage markets and more, we have set ourselves apart with a commitment to dependable products and unparalleled service. This has resulted in solutions designed to supplement existing industrial solutions and high IOPS flash arrays for industrial and enterprise applications. The expanded business lines are leading our next steps in being a comprehensive solution and service provider in the industrial storage industry.

Founded in 2005 and headquartered in Taipei, Taiwan, Innodisk services clients globally with engineering experts and sales teams in China, Europe, Japan, and the United States. With abundant experience and an unrivaled knowledge of the memory industry, Innodisk develops products with excellent quality, remarkable performance and the highest reliability.

For more information about Innodisk, please visit <http://www.innodisk.com>.

## Our Advantages

### Technical Aptitude by Design

Our advantage lies in our portfolio of hardware, software and firmware technology and how we arrange these basic building blocks into new works of innovation.

### Deeply Rooted in the Market

The awareness of the pit falls and opportunities of vertical markets allow us to view the full picture when crafting the optimal solution.

### We Are in It Together

To reach the optimal solution, working together with our partner from day one is paramount. The best possible outcome can be managed by developing solutions jointly.

Application

## Surveillance in the AIoT Era

Comprehensive Memory, Storage, and Communication Solutions for the Surveillance Sector

The role of surveillance and video recording is poised to play a major role in the future markets of where AI and IoT meet. AI requires more computational power, which puts a bigger toll on the IoT device. Adding on the environmental challenges of IoT applications, the requirements can be difficult to meet. However, with robust and optimized components, these challenges can be met head on.

### Storage Optimized for Video Recording

RECLine™ is the exclusive firmware algorithm for video recording that ensures steady performance without any frame-loss.

### Compact Memory that Doesn't Waver

Our Very Low Profile (VLP) and Mini DRAM modules combine small form factors with high performance to make sure data recording goes off without a hitch.

### Rugged Power and Signal Transmission

Innodisk's PoE extension cards provide ruggedness and galvanic isolation, ensuring uncompromised signal strength and power to your devices.

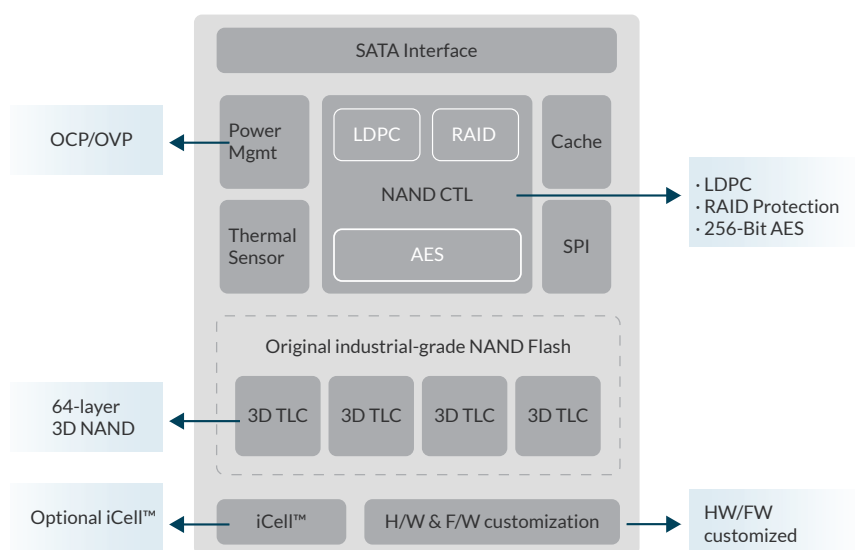

Flash

## Entering the Era of 3D NAND

Industrial 3D TLC solution with top reliability and high endurance

3TG6-P and 3TE7 are Innodisk's latest product lines with 3D TLC NAND Flash, and are targeted at industrial applications. The series have reliable design, self-developed firmware and MLC-like characteristics. 3TG6-P series is a performance-oriented product line, and offers high speed and high capacity; In terms of boot drive and small form factors storage, the 3TE7 is the perfect choice. Both 3TG6-P & 3TE7 support various form designs, including: 2.5" SSD, M.2, SATADOM and mSATA.

### Benefits

- Reliability: Advanced LDPC ECC engine & internal RAID engine offer additional level of data protection
- Data Integrity: Unique power management & iData Guard™ to ensure data integrity under various environmental conditions
- Optimality: Extreme sequential and random performance with 3D NAND solution, no performance drop concern
- Security: 256-bit AES & End-to-End data path protection\*
- Quality: Original industrial-grade NAND flash chips
- Manageability: iSMART & iCAP compatibility

Flash

# InnoREC™ Surveillance Storage Series

Firmware Optimized for the Strict Requirements of the Surveillance Industry

InnoREC™ is Innodisk's proprietary flash feature set designed specifically for surveillance applications. Through the smart integration of firmware and hardware, the speed and steady performance required by modern surveillance solutions is fully met.

## RECLine™

RECLine™ is the exclusive firmware algorithm for video recording that ensures steady performance without any frame-loss

## iData Guard

iData Guard is our patented power cycling data management system, which helps to ensure surveillance data integrity during and after unexpected power outages

## iCell

Ensures data is flushed from volatile storage to prevent the loss of valuable surveillance data during sudden power failures

## Quick Erase

Quick Erase can delete all data within a few seconds – preventing leakage of potentially sensitive data

## Thermal Sensor

When the surveillance system threatens to overheat, an immediate warning is issued. The SSD will automatically adjust the transmission frequency to ensure continued performance and reliability

## Passive Cooling

The SSD layout is design for maximum heat dissipation – ensuring performance and enhanced data retention

Flash

# Comprehensive M.2 solutions

Diverse M.2 Solutions for Industrial and Embedded Storage

After the M.2 was announced as the next generation form factor, there has been a steady migration from the older mPCIe cards. This new form factor is instrumental for new IoT application as more and more platforms are adopting it as their main port.

To stay ahead of the curve, Innodisk has launched comprehensive M.2 solutions for both data storage and embedded expansions. This complete series includes 2230, 2242, 2260, and 2280 form factors that support both B and M key configurations, thus ensuring compatibility with the newest platforms on the market.

Innodisk M.2 solid state drives (SSD) are offered in a wide variety of models. The SATA III interface is a true and tested solution for standard applications, while PCIe 3.0 is the go-to for systems requiring exceptional performance. Furthermore, extensive firmware customization is also available: the M.2 SSD can be optimized for server and security environments, and it is also available with the newest 3D NAND flash.

Innodisk's comprehensive M.2 storage solutions are the perfect fit for the next generation of IoT devices.

## Wide Product Range

- PCIe and SATA Solutions
- SLC/iSLC/MLC/3D TLC

## Industrial-Design

- Wide Temperature -40~85°C
- High Durability

## Flexible Solutions

- Multiple Form Factors
- Compatible with Both B and M Key

## Power Loss Protection

- iData Guard™
- iCell™ (Optional)
- iPower Guard™

DRAM

# The DDR4 32GB 2666 Family

DRAM that Meets the Need of High-Capacity IoT Applications

Innodisk's new, industry-leading 32GB DRAM modules are optimized for high-end server and data center use. The modules are compatible with both the Z370 and Z390 chipsets. These high-capacity DRAM are available in a variety of form factors, including UDIMM, SODIMM, with ECC as an optional addition.

## Anti-Sulfuration DRAM for ALL DDR4 DRAM Modules

Robust Modules that Bring the Needed Endurance to the Industrial Market

The Innodisk Many Anti-Sulfuration DRAM modules are designed for operators that are facing increasing difficulty with high sulfur content in their surroundings. The sulfur can cause corrosion damage to DRAM modules and lead to complete module failure, and, most detrimental to the operator, costly downtime.

These modules are protected against the high sulfur concentrations by a specialized design that shields the components, effectively sealing off the exposed parts of the module from the sulfur in the air.

### What is sulfuration?

- Sulfur reacts with silver used in DRAM modules and creates silver sulfide ( $\text{Ag}_2\text{S}$ )
- This corrosion lowers conductivity and can potentially lead to module failure
- Sulfuration is most commonly encountered in areas with pollution and volcanic activity; as well as in the petrochemical, mining and energy sector

**Free**

### Free-of-Cost Upgrade

- All Innodisk DDR4 modules will be upgraded without any added cost to include robust anti-sulfuration measures

### Long-term Protection

- Decrease your TCO by investing in modules with lasting durability in hostile environments

# Bringing Industrial-Grade Machine Vision and Surveillance to the Forefront

New PoE+ Expansion Cards Further Enhances Power Output and Reliability

PoE+ enables reliable connection to Powered Devices (PD) such as surveillance cameras and machine vision cameras, as well as point-of-sales systems and voice-over-IP equipment.

These rugged expansion cards are highly compatible, and have been extensively tested at full loading with different camera types, on different platforms and operating systems. The high compatibility with machine vision cameras makes the PoE expansion cards an integral part of quality assurance systems and also helps pave the way for deep learning applications.

Available in space-saving form factors and with flexible mounting options, the Innodisk PoE expansion cards are easily integrated into any Power Source Equipment (PSE). These expansion cards sports isolated, wide temperature design and is certified to withstand HiPOT and surge occurrences, making it the optimal choice for operation in harsh conditions.

## Wide Compatibility

- Tested and approved for small and large size surveillance cameras as well as machine vision cameras
- Compatible across on a wide array of platforms and operating systems

Technical Innovation

# A Commitment to Technical Innovation

Innodisk continues to bring the most innovative products to a range of industries by developing outstanding proprietary technologies. Here are just few examples of Innodisk's breakthroughs and innovations.

## Cable-Less Power

Pin 7/ Pin8

Innodisk's patented Pin 7 and Pin 8 SATA power technologies take the cable-less concept to the next step by eliminating the need for power cables. Yielding a 100% cable-less, shock resistant, space saving plug-and-play storage solution that optimizes airflow and makes the best use of limited board space in embedded and rackmount server systems.

## iSMART™

iSMART is a powerful, easy-to-use SSD and DRAM health monitoring tool. It allows system integrators to track important storage and memory information, such as temperature, storage space, bad blocks, lifespan and firmware, all under one platform. With iSMART, system integrators can better manage storage usage and know exactly when to replace a device before the end of its life cycle.

## iCell™

iCell is a smart data protection technology that is built into Innodisk's SSDs. iCell is crucial for mission-critical applications, where working under extreme conditions and without backup power is unavoidable. Our iCell technology provides a mechanism to instantaneously discharge data stored in temporary volatile DRAM buffers to flash storage, to ensure the safety of data during power failures.

## Passive Cooling

---

SSDs may easily lose data due to overheating. Innodisk has redesigned the cable layout by using copper to separate the controller and flash. This reduces the thermal conductivity rate and enhances data retention.

## iPower Guard™

---

Innodisk's Power on Protection is a new circuit protection feature that is dually designed to allow uninterrupted SSD functionality in an inconsistent power supply situation, as well as provide accelerated boot-up for emergency startups or system shutdowns.

## Stable Power Control

---

Innodisk's stable power control is used to optimize power circuits and establish OCP/OVP mechanisms to prevent electronic components from burning out due to voltage or current surges.

## iSLC

---

iSLC is our exclusive technology designed to ensure longer-lasting and more reliable performance than conventional MLC NAND flash. Through the use of flash management algorithms, iSLC improves SSD endurance up to 20,000 cycles, increasing the lifespan to at least 7 times longer than MLC-based solutions.

# A Commitment to Technical Innovation

Innodisk continues to bring the most innovative products to a range of industries by developing outstanding proprietary technologies. Here are just few examples of Innodisk's breakthroughs and innovations.

## Thermal Sensor

Innodisk's Thermal Sensor is a robust heat and workload management technology that is built into our DRAM modules and flash storage. It is a crucial solution for industrial & aerospace and defense applications, which are often susceptible to extreme heat and performance stress. Innodisk's Thermal Sensors enables thermal throttling to lower the working temperature while distributing workloads, which prevents modules from overheating, and greatly enhances system performance and stability.

## iData Guard™

Innodisk's iData Guard is a comprehensive data protection mechanism that functions before and after a sudden power outage to the SSD. Low-power detection terminates data writing before an abnormal power-off, while table-remapping after power-on deletes corrupt data and maintains data integrity. Innodisk's iData Guard provides effective power cycling management, preventing data stored in flash from degrading with use.

## Garbage Collection/TRIM

Innodisk's Garbage Collection/TRIM technology is used to maintain data consistency and perform continual data cleansing on SSDs. It runs as a background process, freeing up valuable controller resources while sorting good data into available blocks, and deleting bad blocks. It also significantly reduces write operations to the drive, thereby increasing the SSD's speed and lifespan. With Innodisk Garbage Collection/TRIM technology, an SSD's health and performance is optimized.

## L³ Architecture

---

Innodisk's exclusive L³ Architecture firmware, which combines Long-Life with LDPC ECC, yields a prolonged lifespan, exceptional reliability and high performance. Innodisk's exclusive industrial oriented firmware also provides a flexible customization service, making it perfect for a variety of industrial applications.

## iRetention™

---

iRetention is an intelligent technology created by Innodisk. This agile SSD firmware feature is able to maintain data retention in the face of NAND flash aging and high-temperature variations. With this firmware feature, SSD retention time is significantly extended compared to standard NAND flash specifications.

## InnoRobust™ Data Security

---

The InnoRobust™ Data Security is comprised of Security Erase, Destroy, Physical Destroy and Quick Erase. These sophisticated technologies are aimed at quickly and efficiently erasing and destroying data that is in danger of being compromised.

## AES Hardware Encryption

---

Advanced Encryption Standard (AES) is the standard cipher used by the US government to protect confidential data on storage devices. By integrating the encryption-engine in the SSD controller, the encryption/ decryption process is done without affecting CPU performance. The encryption key is safely stored away in the SSD and can be destroyed in less than a second, rendering all stored data useless as it cannot be decrypted.

## iRAM

The testing quality and strictness of iRAM easily surpasses that of similar testing software in ECC and RDIMM modules. With this exclusive Innodisk tool, any underperforming component will quickly be identified and weeded out. This takes into account every piece of IC and ECC IC status. Moreover, iRAM is a web-based diagnostic tool that not only simulates multipoint servers and workstation computing scenarios, but also detects unexpected issues where other software falls short in order to ensure the highest quality, reliability, and performance; ultimately reducing your maintenance cost.

## Conformal Coating

Innodisk conformal coating refers to the chemical materials that are applied in layers to cover components. The thickness of the coating ranges between 0.03 mm and 0.13 mm thick. Conformal coating protects against moisture, contaminants, dust and acid-or-alkaline materials, meeting IPC-A-610 standards for electronic components.

## Anti-Sulfuration

In the mining, petroleum and chemical industry, or installations in areas with volcanic activity, hydrogen sulfide gas is often a common challenge. The gas will react with the silver found in DRAM ICs, which can result in lower conductivity and eventual failure. This is effectively mitigated by covering the resistors with a sulfur resistant material, ensuring smooth operation in harsh environments.

## Wide Temperature

Innodisk's wide temperature range design has extended the existing JEDEC standard range from -40°C to 85°C. Innodisk's wide temperature Flash and DRAM modules are designed for industrial, and aerospace and defense applications. Wide temperature design is vital in ensuring operation and performance reliability in extreme temperatures.

---

## Side Fill

Side Fill is value-added technology that can improve device reliability and extend product life. By applying resin on three sides of the DRAM IC, Side Fill can reinforce the joints between the BGA and the PCB. Tests show that when using Side Fill, DRAM IC can tolerate 1.5 times the amount of tension. If the device needs to remain operational during strong tremors or stringent thermal cycling, we highly recommend taking advantage of our Side Fill DRAM, especially so for these applications: factory automation, defense & aerospace and renewable energy.

---

## Heat Spreader

Adding a Heat Spreader will enhance a module's ability to quickly disperse heat in high-temperature and heavy workload environments. The Heat Spreaders are compatible with all form factors and will help ensure that temperatures stay below the critical limit which can cause module failure. By reducing the thermal stress, the Heat Spreader will also extend the lifespan of the DRAM module.

# Different Applications

Innodisk focuses on providing reliable memory and expansion solutions for mission-critical applications. We understand the importance of quality in industrial and embedded flash, DRAM, expansion card and software products. Therefore, our solutions are all crafted to meet the individual needs of each vertical market. Our experienced in-house firmware development team delivers fast turnaround and knowledgeable support whenever customization is required.

## Embedded & Server Boot-up Solution

The Innodisk Boot-up series is designed for industrial and server applications. Due to its tiny form factors, M.2 and SATADOM<sup>®</sup> frees up a precious bay for other storage options. The SATADOM<sup>®</sup> easily fits in a 1U environment with an exclusive Cable-less design; it exemplifies true plug & play and eliminates messy cables.

## Surveillance

The number one concern for modern day surveillance applications is stable data recording. With our InnoREC<sup>™</sup> feature set, firmware is optimized to ensure lasting and stable writing performance – ensuring zero loss of data quality. With restricted space and simultaneous read/write operations, high speed and compact memory solutions are also an imperative. Our Very Low Profile (VLP) and Mini DRAM modules combine small form factors with high performance to make sure data recording goes off without a hitch.

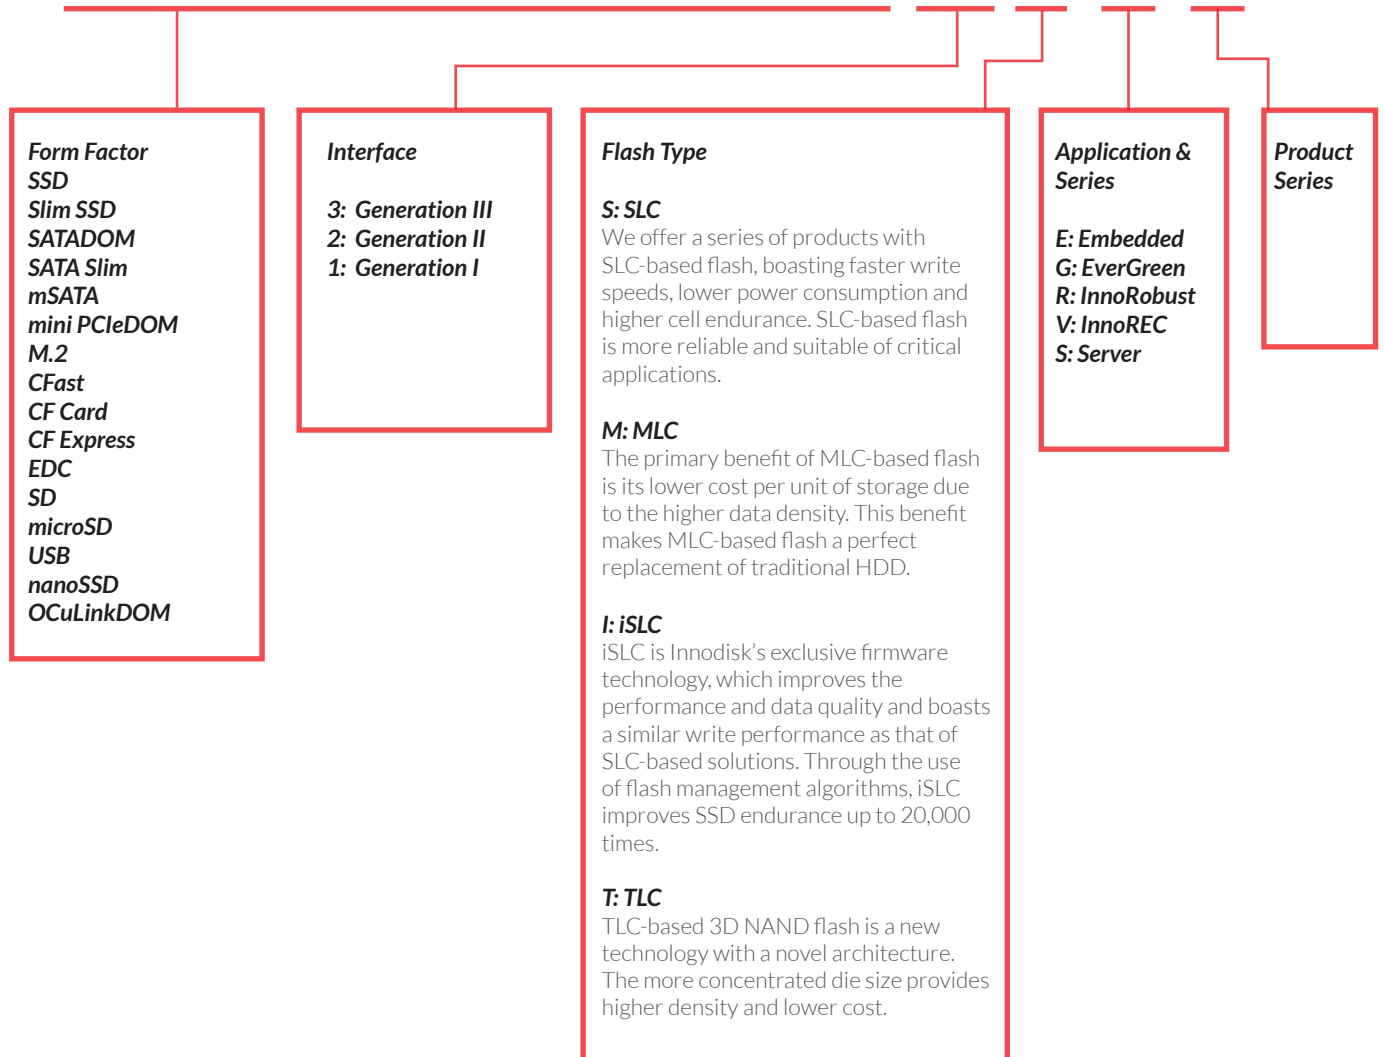

## Medical

Using iCAP<sup>™</sup> your medical devices can be gathered under a single umbrella regardless of physical location. This includes flash-based solutions that are varied and easily customizable to fit the requirements of each medical application, as well as DRAM which is an essential component in every smart medical device. Furthermore, there is no need for concern about future component availability. These hardware solutions are all ensured to have long-time supply and a fixed BOM.

# New Flash Product Naming Rule

## 2.5" SATA SSD 3TE7

### **G: EverGreen**

The EverGreen series is designed with an integrated external DRAM cache which significantly improves SSD random data transfer rate and extends lifespan.

### **R: InnoRobust**

InnoRobust series meet all of today's aerospace and defense application requirements. InnoRobust storage products are fully compliant with aerospace and defense standards, including MIL-STD-810G and MIL-I-46058C. InnoRobust products are fully protected against heat, dust, extreme temperatures, shock, vibration, and other environmental stresses. We also deliver industry-leading data protection technologies to keep sensitive information secure.

### **E: Embedded**

Embedded series is the best solution for the industrial embedded system because it offers reliability, high performance and long endurance. We offer complete form factors to fulfill customer and business needs, including 2.5" SSD, 1.8" SSD, SATADOM, mSATA, SATA Slim, SATADOM, iCF & CFast, EDC, and SD.

### **V: InnoREC**

InnoREC SSDs are specifically designed for surveillance applications and boasts smart firmware algorithms that guarantees a continuous, stable data recording.

### **S: Server**

The SATADOM® server boot-up devices are designed for an easy server integration, and reliable performance. The devices are certified for Windows Server 2016 Hyper V and VMware hypervisors.

## Flash Memory

Innodisk flash memory products are designed to be highly reliable and stable, and provide longer life cycles for the embedded and industrial systems in which they are used. Innodisk offers the industry's widest selection of flash memory form factors, including standard 1.8" and 2.5" Industrial SSDs, M.2, SATADOM®—the smallest high-speed SATA storage in the industry, CompactFlash Cards, mSATA, SATA Slim, and USB Flash Drives. Our products are available in 3D NAND triple-level cell (TLC), single-level cell (SLC), and multi-level cell (MLC) flash types, as well as iSLC – our own proprietary technology that merges the best features from MLC and SLC.

# M.2

The Innodisk M.2 series pack a lot of performance into a thin, industrial grade form factor. The M.2 series includes both Non-Volatile Memory Express (NVMe) and SATA devices. The NVMe specification is designed specifically for flash devices and can deliver the fastest speeds in the industry.

## M.2 (NVMe) Highlights

- PCIe Gen III×2 and×4 solution
- True industrial-grade PCIe NVMe SSD
- Heatsink-less design
- Wide range of form factors and dimensions available, including type 2242, 2260, and 2280
- Supports industrial-grade wide temperature -40°C~85°C
- iData Guard™, iPower Guard™ and iCell™ technology for data protection and integrity during abnormal power failure
- Supports iSMART™ disk health monitoring
- Supports End-to-End Data Path Protection (EETP)

# SSD

Innodisk SSDs bring a whole new level of high performance to memory storage. Our wide selection of SSDs are designed for different applications, including industrial/embedded, enterprise server, aviation, defense, and other semi-industrial applications, such as thin clients, POS, and kiosk. Our SSDs come in 3D TLC, iSLC, SLC and MLC types, and support PATA/IDE 44 pin, SATA II (3.0Gb/s), and SATA III (6.0Gb/s).

Model Name	2.5"SATA SSD 3TE7	2.5"SATA SSD 3TG6-P	2.5" SATA SSD 3SE4
Key Features	1. Truly industrial designed firmware with 3D NAND 2. Advanced LDPC ECC engine 3. Internal RAID Technology 4. DRAM-less, high-level data integrity 5. Excellent data transfer speed	1. Extreme seq. and random performance with 3D NAND solution 2. Advanced LDPC ECC engine 3. RAID engine offer additional level of data protection	1. High quality SLC-based solution 2. ## What is iCell?

iCell Technology gives the SSD a power boost in the event of an abnormal power failure and ensures reliable and accurate data transfer from DRAM cache to NAND flash.

## What is iSecurity?

The iSecurity function under iSMART allows the user to easily operate the data erase command. The user may select the data erase function, monitor erase progress and also compare data before and after the erasure.

## What is TRIM?

SSDs are made up of millions of NAND flash cells. They can be written into groups called pages (generally 4KB in size) but can only be erased in larger groups called blocks (generally 128 pages or 512KB). The addresses of the deleted files are sent along with the TRIM command to the SSD's controller so the drive can function optimally. The TRIM commands allows the SSD to delete data more expediently, thus increasing overall performance. The TRIM command is generally sent from the OS when the system is idle. This cleans up invalid data from the blocks so the drive can perform like new.

# SATADOM<sup>®</sup>

Innodisk's Serial ATA Disk on Module (SATADOM<sup>®</sup>) is the world's smallest form factor with exclusive built-in Pin 7 and Pin 8 VCC, which simplifies motherboard design. Since it has no external cables, it is more robust and enhances the disk functions of various industrial and enterprise applications. Innodisk's SATADOM<sup>®</sup> also supports the SATA II and SATA III interface with faster data transfer rates and is available in capacities ranging from 512MB up to 256GB.

## SATADOM-SL 3ME4

Innodisk, the service-driven flash and DRAM module provider, features the innovative SATADOM<sup>®</sup> patented Pin8 and Pin7 cable-less SATA power combined with exclusive L3 architecture, prolonging the lifespan of SATADOM-SL 3ME4 with exceptional performance and reliability. SATADOM-SL 3ME4 is the best storage design for industrial computers and server boot drives. SATADOM-SL 3ME won the Taiwan Excellence Award 2017 in the highly competitive category of "Computer Hardware and Peripheral Equipment."

### 3ME4 series

- High performance
- LDPC
- Low WAI
- SMART supported
- Original MLC designed

### SATADOM-SL

- Tiny size
- Cable-less (Pin8 /Pin7 supported)
- OS boot drive
- Durable

## Flexible power supply design

- External power cable
- SATA Pin 8 VCC
- SATA Pin 7 VCC

## SATA Slim

The Innodisk SATA Slim is compliant with the JEDEC SFF-8156 standard form factor and ATA protocol. It does not require drivers, and can be configured as a boot device or a data storage device. It is also suitable for portable/hand-held devices, thin clients, and industrial applications that require the effective reduction of operation system boot time and power consumption. With a 7+15 pin SATA interface, the Innodisk SATA Slim supports most platforms with a standard SATA port.

Model Name	SATA Slim 3TE7	SATA Slim 3TG6-P	SATA Slim 3SE4
Key Features	1. Industrial-grade firmware with 3D NAND 2. Advanced LDPC ECC engine 3. Internal RAID Technology 4. DRAM-less, high-level data integrity 5. Excellent data transfer speed	1. ## mSATA

mSATA, which is compliant with the JEDEC MO300/MO300B standard, was announced by the Serial ATA International Organization on September 21, 2009. Applications include netbooks, portable devices and other devices that require a smaller solid-state drive. The connector is similar in appearance to a PCI Express Mini Card interface and is electrically compatible; however, the data signals need a connection to the SATA host controller instead of the PCI-express host controller. Innodisk's mSATA supports high-performance data transfer rates of 1.5 Gb/s, 3.0 Gb/s and 6.0 Gb/s.

Model Name	mSATA 3TE7	mSATA 3TG6-P

# SD/micro SD

Innodisk SD and microSD cards are single-level flash devices built for rugged applications in the embedded field. As an industrial-grade SD/microSD card, these cards deliver outstanding performance of up to 54MB per second as well as excellent endurance and reliability, especially compared to other cards used in the mobile market. The Innodisk SD and microSD cards are compatible with SD 2.0 /SD 3.0 standards and support SDHC Class 10(UHS-I). They also feature SMART technology, which monitors the reliability of these SD cards.

# CF Card

Innodisk's Industrial CompactFlash Memory Card (iCF) complies with the PCMCIA\* ATA standard. Designed to replace traditional rotating disk drives, Innodisk iCFs are embedded solid-state data storage systems that are designed for mobile computing and the industrial work place.

Model Name	iCF 9000	iCF 1SE	iCF 1ME
Key Features	1. High sustained data transfer speed 2. Enhanced power cycling management	High quality SLC-based solution	1. Budget friendly MLC-based solution 2. Enhanced power cycling management
Interface	PATA	PATA	PATA
Connector	50pin CF connector	50pin CF connector	50pin CF connector
Flash Type	SLC	SLC	MLC
Capacity	1GB~64GB	512MB~8GB	8GB~256GB
Max. Channel	4	2	2
Sequential R/W (MB/sec, max.)	110/100	40/30	110/110
Max. Power Consumption	0.95W (5V x 190mA) 0.63W (3.3V x 190mA)	0.75W (5V x 150mA) 0.5W (3.3V x 150mA)	0.76W (5V x 155mA) 0.52W (3.3V x 155 mA)

# CFast

The Innodisk CFast is a small form factor card standard with high data storage capacity. It is suitable for semi-industrial applications. Compliant with the CFast 2.0 standard, it is designed with a 7+17 pin connector and is SATA compatible. The Innodisk CFast offers data transfer rates of sequential read up to 560 MB/sec and of sequential write up to 520MB/sec.

Model Name	CFast 3TE7	CFast 3SE4
Key Features	1. Industrial-grade firmware with 3D NAND 2. Advanced LDPC ECC engine 3. Internal RAID Technology 4. DRAM-less, high-level data integrity 5. Excellent data transfer speed	1. High quality SLC-based solution 2. DRAM-less, high-level data integrity 3. LDPC technology secures SSD reliability 4. Excellent data transfer speed
Interface	SATA III 6.0Gb/s	SATA III 6.0Gb/s
Connector	7pin+17pin	7pin+17pin
Flash Type	3D TLC	SLC
Capacity	32GB~512GB	8GB~64GB
Max. Channel	4	2
Sequential R/W (MB/sec, max.)	560/330	530/360
Max. Power Consumption	1.81W (3.3V x 550mA)	1.59W (3.3V x 480mA)

# Mini PCIeDOM

The Innodisk Mini PCIeDOM is a Flash based disk module with standard Mini PCIe form factor, and PCI Express Gen.1 interface. It is suitable for board maker or SI to design in the product as a boot drive or a storage device. Meanwhile, it supports multiple operating systems with no driver needed, including Windows XP, Windows 7, and Linux based OS.

Model Name	Mini PCIeDOM 1SE	Mini PCIeDOM 1ME3
Key Features	1. Standard Mini PCIe form factor 2. Driver-less 3. PCIe Gen.1x1	1. Standard Mini PCIe form factor 2. Driver-less 3. PCIe Gen.1x1

## EDC

The Innodisk Embedded Disk Card (EDC) complies with PCMCIA\* ATA standards and fits into all platforms with an IDE connector. The Innodisk Embedded Disk Card comes in capacities ranging from 512MB to 256GB and is available in 40-pin and 44-pin connector packages.

Model Name	EDC 1SE Vertical Type	EDC 1SE Horizontal Type	EDC 1ME Vertical Type	EDC 1ME Horizontal Type
Key Features	1. Dust prevention 2. High quality SLC-based solution	1. High quality SLC-based solution 2. Supported mounting hole	1. Budget- friendly MLC-based solution 2. High performance PATA solution	1. Budget- friendly MLC-based solution 2. High performance PATA solution

# USB

The Innodisk industrial-grade USB series is built using SLC NAND flash and features an attractive small form factor. It provides high-capacity flash memory storage while delivering faster data transmission with high reliability. It also complies with the high-speed USB 3.0 interface and is backward compatible with USB 1.1. The Innodisk USB series has a variety of special features, from plastic and metal housing to secure mounting holes to EDC choices.

Model Name	USB Drive 3SE		USB Drive 3ME	USB Drive 2SE
Key Features	1. Metal housing to enhance ESD protection 2. 30μ golden finger for highly reliable data transfer quality			1. Metal housing to enhance ESD protection 2. 30μ golden finger for highly reliable data transfer quality

# nanoSSD

The Innodisk nanoSSD is an integrated SATA storage device. It combines Innodisk's ID106/ID108 NAND flash controller and latest NAND flash in a JEDEC MO-276(SATA  $\mu$ SSD) form factor with one single ball grid array (BGA) package, giving the nanoSSD a compact size and making it very easy to design in. The Innodisk nanoSSD , supporting SATA III 6.0Gbp/s , offers excellent high data transfer rates, along with lower power consumption. It is an ideal solution for any kind of limited-space application.

## Features

- Integrated NAND Flash controller with Flash in a single chip
- Compliant with JEDEC MO-276 (SATA  $\mu$ SSD) specifications
- SATA III interface with BGA package
- Intelligent Flash management & real time garbage collection

## Benefits of nanoSSD

- Chip type, easy to design in without mechanical interference
- SATA interface, highly compatible with x86 system
- Excellent data transfer rates
- Fully compliant with industrial standards
- Suitable for ultra-thin or compact systems
- Zero peripheral circuits

The Innodisk nanoSSD mechanical drawing

Model Name	nanoSSD 3SE	nanoSSD 3IE3	nanoSSD 3ME3

# Software Solutions

With our newest Innodisk Cloud Administration Platform (iCAP™) we offer complete storage monitoring services for IoT applications. In addition, our extensive software portfolio is designed to meet the growing needs of edge integration in the embedded and industrial market.

Software portfolio:

## Cloud Solutions

- iCAP™ – Cloud Administration Platform

## Edge Solutions

- iSMART™ –Flash Device Management
- iTracker™ –SD Card and USB Management
- iCover™ – System Recovery
- iOpal™ – Self-Encrypting Drive Management

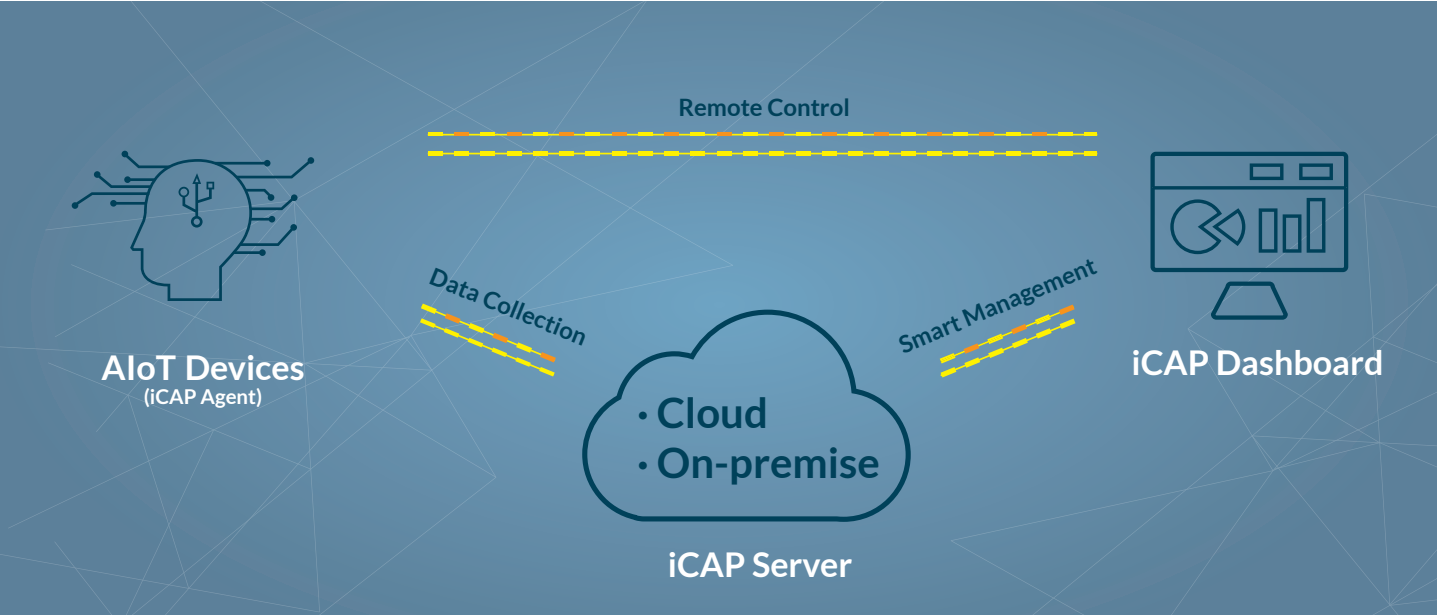

# Cloud Solutions

iCAP™ is a browser-accessed management platform that allows you to monitor the status of solid state drives (SSD), memory and other components in edge devices. It does this by gathering data from all connected devices and storing it on a central server, either on the cloud or on a company intranet. From here the data is easily accessible from your cell phone, pad or laptop with online access.

## System Architecture

## iCAP Dashboard Management Interface

The web page allows multiple dashboards that enable the user to easily manage connected devices through supported browsers

Keep tabs on current CPU and Memory loading

Effectively monitor remote device status

User-friendly monitoring function allowing the user to manage and analyze storage information lifespan in detail

Customizable widgets including gauges, Google Maps, and various tables presenting device data

The screenshot shows the iCAP dashboard with several widgets. The 'Device status' widget shows 666 Online and 334 Offline devices. The 'CPU Loading' and 'Memory Loading' widgets show bar charts for different device groups. The 'Storage Lifespan' widget shows a donut chart with 1305 and 385 units. The 'Storage Health' widget shows a pie chart with 595, 917, and 289 units. The 'Storage Temperature' widget shows a gauge with 1498 and 5 units. The 'Device Location' widget shows a map with various location markers.

## iCAP Advantage

Windows

Linux

### Extensive Compatibility

The iCAP agent is supported on both Windows and Linux platforms and can be seamlessly accessed through long list of supported web browser.

### Flexible Dashboard

User can freely alter the dashboard through a dynamic UI and device grouping and choose the parameters and widgets relevant to their application.

### System Backup & Recovery

iCAP integrates Innodisk's proprietary iCover tool that allows for remotely initialized system backup and recovery

### Effective Event Tracker

The event notification tracker will log all changes and keep the user up to speed, enabling a swift resolution to any issues that might occur.

### Comprehensive Indexing

The index table accessible through the dashboard allows you to quickly get more details on device status

### 3rd Party Support

iCAP can also monitor devices of other brands as long as the it runs Innodisk storage components

## System Requirements

### Web Service

Web browsers that supports HTML5, CSS3, JavaScript:

Microsoft Internet Explorer 10+ | Google Chrome:9.0+ | Firefox:15.0+ | Safari:5.1+

### Server

Hardware Minimum Requirements:

Intel® Core™ i3 2.3 Ghz CPU or above | 4 GB RAM | 20 GB root partition for the system | 100 GB data storage

Operating System:

Ubuntu 14.04+ | Docker 17.03+

### Agent

Hardware:

Bundled with Innodisk Storage products

Operating System:

Windows 10/8.1/7/XP kernel 32/64-bits | Ubuntu 16.04 64-bits | Debian 8 64-bits | Others by request

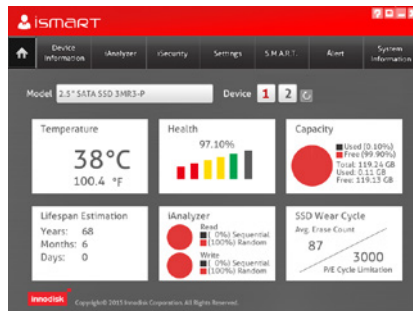

# Edge Solutions

## Easy-to-use tool to access SMART information.

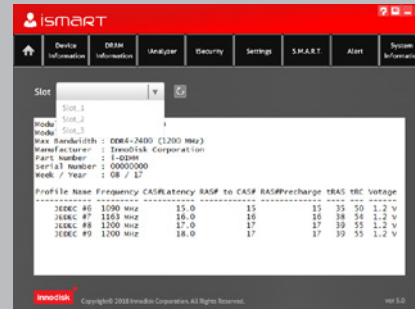

The iSMART tool monitors the health and lifespan of Innodisk's SSDs and DRAM while also providing details on usage patterns. Alerts are easily configured to issue warnings before any critical errors can occur. With iSMART, the user is able to properly integrate Innodisk's SSDs and DRAM into their solutions by carefully monitoring behavior and lifespan during development, integration, and mass production.

### Smart Dashboard

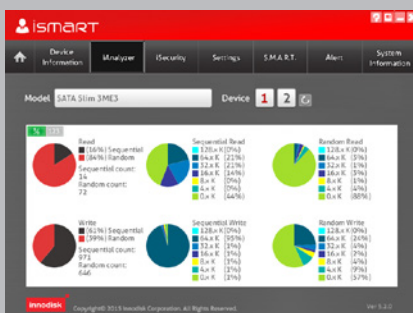

The Dashboard's home provides a quick snapshot of each installed device in the system. This page offers accurate data information regarding Temperature, Health, Capacity, Lifespan, iAnalyzer, and Notifications. Further device information such as S/N, firmware version, interface, etc. is also available.

### DRAM Information

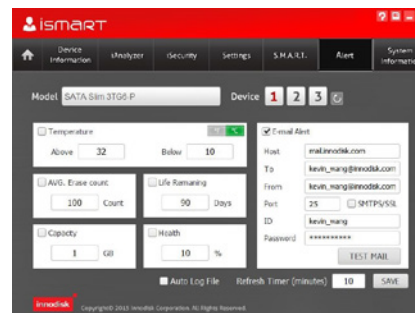

No need to physically access the DRAM module to ascertain device info. The DRAM will provide all information to iSMART, making it easily available to the user. The feature will show P/N, data transfer rate, capacity, data code, etc.

### iAnalyzer

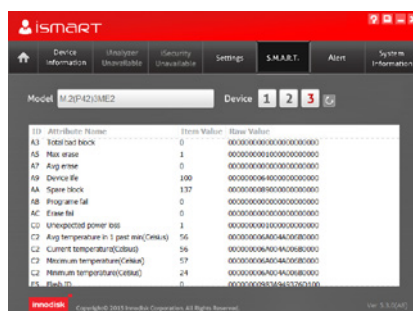

When activated, the iAnalyzer tab displays the read/write behaviors of the SSD in real time. This allows the user to understand their application usage of the SSD. Sequential and Random I/Os are easily broken down into percentages making them easy to read.

### Alert

The Alert tab helps the user set trigger points with Temperature, Health percentage, Remaining Capacity or Life Remaining. If these trigger points exceed their boundaries, the iSMART utility can send a warning and email to the user notifying them that something may fail.

### PCIe NVMe Support

iSMART supports logging for PCIe NVMe devices. The user can easily check the PCIe storage device health status.

### iSMART for Linux

The iSMART Linux version provides every storage device's SMART values by vnder command, and also fully supports the iAnalyzer function.

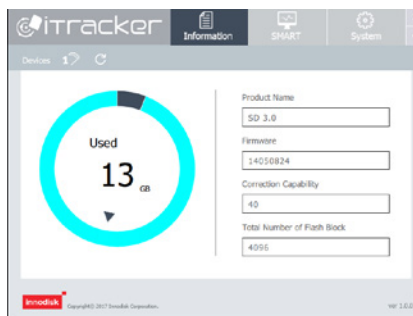

## Easy access to USB and SD SMART information

iTracker is Innodisk's dedicated software tool for SD 3.0 cards and USB products. It offers a customizable approach to accessing flash card SMART values. Compatibility with both Windows and Linux systems and an intuitive user interface ensures an easy system integration and user experience.

Features:

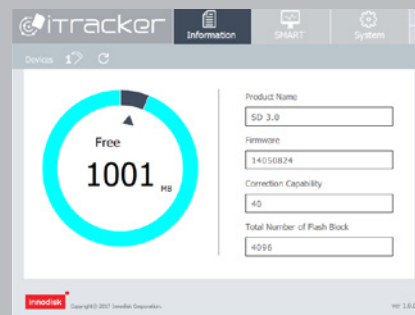

- Dedicated Innodisk Industrial SD Card and USB Management Software
- Intuitive visualized SMART information
- Flexible widgets for customized requirements
- Support for both Windows & Linux systems

### SD Information

- iTracker enables easy access to SD card and USB series information
- SD 3.0 (Hyperstone)
  - Product name
  - FW version
  - Correction capability for flash
  - Total number of flash block
- SD 3ME3 (SM2702)
  - Product name
  - Bus width
  - Speed class
  - Speed grade

### USB Information

- USB series product (SM3268)
  - Product name
  - Manufacture
  - Serial number
  - Firmware version
  - Package version
  - P/E cycles

### SMART

- The iTracker SMART page shows more details about device health status and helps the user predict remaining lifespan
- Write protect feature can also easily be enabled and disabled

### System Page

- iTracker system page enables the user to easily check system information

## Reliable one-key backup and recovery

iCover is an easy-to-use, highly-customized backup and recovery software tool designed for industrial computers. iCover will not only recover the operation system, but also all of the applications, drivers and personal data by using the recovery image. It is fully compatible with Microsoft Windows and Linux operating systems. Even if the system should become unresponsive, this quick recovery tool will restore it to its original state.

### Backup

iCover allows the user to run any backup from any specific point in time

### Recovery

The recovery function allows for unstable systems to quickly return to a status of working operability thus reducing downtime to a minimum

### iCoverXUSB

iCover allows you to create an image file to load onto your own iCover USB Dongle

### Tools

iCover gives you access to a basic command line tool and plans for iBuilder for OS building and FnKey recovery are also in the works

## Advantage

### Remote Backup and Recovery

Support SMB/CIFS protocol to backup and recover system image

### UEFI BIOS Support

Supports legacy/ UEFI BIOS recovery

## System Requirements

Items	iCover
Processor	1GHz or faster
RAM	2GB
Supported Devices	Innodisk Storage Devices
OS Support	Windows: Windows XP/7/8.1/10   Windows Embedded Series Linux: Ubuntu/Yotco/CentOS
File System	Windows: NTFS/FAT32 Linux: Ext4/Ext3/Ext2

## TCG Opal-Compliant Software

The TCG defined standard for self-encrypting drives (SED) emphasizes data security and ease of use. Innodisk's software conforms to this standard and can provide a simple and intuitive way to handle SED management. The software allows the user to easily define different ranges for different users – allowing for a system where data is shared on a strictly need-to-know basis.

- Limits permissions toward self-encrypting drives, need correspondence to the relevant credentials or passwords for the different levels of functions
- Set locking range allows setting up divided locking range for different authorizations
- Device locking setting information
- Pre Boot-up Authorization(PBA) is a process used to add a shadow Master Boot Record (MBR) region and implement the boot-up authorization procedure by entering correct password
- Revert function can be divided into two levels, which are representative of different reverting contents.

## Advantages

### User-friendly

Gives an intuitive user interface to the TCG Opal 2.0 specifications and SED management while supporting up to 5 devices simultaneously.

### Multi-function

iOpal's data storage management features are designed to enhance data security and communication with the host system.

**Windows**

**Linux**

### High compatibility:

iOpal is available in both Windows and Linux versions for a much broader applicability

#### Form Factor

3MG2-P with AES	2.5" SSD, M.2(S42,S80), mSATA, SATA Slim
3SE2-P with AES	2.5" SSD, 1.8" SSD

## Supported OS List

Windows 7 / Windows 10 / Linux Ubuntu / Linux Fedora

## DRAM Modules

Innodisk's industrial-grade DRAM series features high-quality memory modules that have been specifically designed and developed for industrial computers and similar applications. Our specialized SPD team is ready to provide system designers with a complete turn-key solution for any engineering requirements.

Innodisk's DRAM modules are categorized to meet different systems' needs, and supports DDR4, DDR3, DDR2, DDR, and SDRAM. Our DRAM modules are available in 4 product lines: Embedded, Server, Wide Temperature, and Special Customized.

Innodisk's comprehensive range of DRAM modules includes: Unbuffered DIMM, Unbuffered SO-DIMM, Unbuffered ECC DIMM, Unbuffered ECC SO-DIMM, Mini DIMM, and registered DIMM, conformal coated DRAM, and side filled DRAM.

# IC Grade

## IC Hierarchy

Original IC	<b>Original IC (Innodisk)</b> <ul style="list-style-type: none"><li>- Fully tested by major IC suppliers</li></ul>
eTT	<b>Effectively Tested DRAM</b> <ul style="list-style-type: none"><li>- Effectively tested but test patterns can vary by suppliers</li><li>- Logo unmarked or only marked with partial IC part number</li></ul>
uTT	<b>Untested DRAM</b> <ul style="list-style-type: none"><li>- Untested</li><li>- Logo unmarked</li></ul>
Low Grade	<b>Low Grade</b> <ul style="list-style-type: none"><li>- DRAM IC with unknown quality confirmed as not having full data sheet parts</li></ul>

## Distinguishing Original from Lower Grade IC

## Why do we only use “Original IC”?

### 1. Top Quality

Environmental and Application Challenges: The areas Innodisk operates in are industrial in nature. These areas give rise to harsh environments and a demand for long-lasting devices, which are the principal challenges we face.

Innodisk uses original IC, not just for the quality guarantees, but also for the international expertise and experience of the manufacturer. Together, the original IC manufacturer and Innodisk offer the customer the most thorough dual guarantee that ensures that you are equipped to face any challenges in your way.

Technology and market development: IoT, AI and AIoT are already solid trends that are actively pursued by the actors in the industrial and embedded markets. High-quality original ICs are necessary to meet the needs of heavy workloads and the high-performance requirements seen in these applications.

### 2. Original Manufacturer Report

Any device operating under long periods of time will be susceptible to break down and damage. Original man can not only help recycle faulty products and repair damaged ICs, but also provides a complete repair report. This will allow the customer to better understand the reason behind the malfunction and take the necessary steps to avoid future occurrences. However, the original manufacturer will not acknowledge lower grade ICs (as these are third party) and will neither provide a repair report.

# Embedded

## Embedded UDIMM

UDIMM modules are DRAM modules meant to be used as standard products for general embedded applications. These modules are compliant with JEDEC standards and available in DDR1, DDR2, DDR3, and DDR4.

Series	Standard Solution	
Module Type	DDR4 UDIMM	DDR3 UDIMM
Data Rate	2133 MT/s, 2400 MT/s, 2666 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s
Capacity	2GB/4GB/8GB/16GB/32GB*	2GB/4GB/8GB
Function	Non-ECC Unbuffered Memory	
Pin Number	288pin	240pin
Width	64Bits	64Bits
Voltage	1.2V	1.5V/1.35V
PCB Height	1.23 Inches	1.18 Inches
Operating Temperature	0 ~ 85°C	0 ~ 85°C
Anti-Sulfuration	√	—
Value-Added Service (Optional)	Conformal Coating / Side Fill	

32GB\*: The schedule for the 32GB solution by 2Gbx8 IC is dependent on supplier status

Series	Standard Solution	
Module Type	DDR2 UDIMM	DDR UDIMM
Data Rate	533 MT/s, 667 MT/s, 800 MT/s	333 MT/s, 400 MT/s
Capacity	1GB/2GB/4GB	512MB/1GB
Function	Non-ECC Unbuffered Memory	
Pin Number	240pin	184pin
Width	64Bits	64Bits
Voltage	1.8V	2.6V
PCB Height	1.18 Inches	1.16 Inches
Operating Temperature	0 ~ 85°C	0 ~ 70°C
Anti-Sulfuration	—	—
Value-Added Service (Optional)	Conformal Coating / Side Fill	

# Embedded SODIMM

Small-outline DIMMs (SODIMM) modules are general DRAM modules meant to be used as standard products for embedded applications with limited space. These modules are compliant with JEDEC standards and help in eliminating the need for changing designs due to limited space.

Series	Standard Solution		
Module Type	DDR4 SODIMM	DDR3 SODIMM	DDR2 SODIMM
Data Rate	2133 MT/s, 2400 MT/s, 2666 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s	533 MT/s, 667 MT/s, 800 MT/s
Capacity	2GB/4GB/8GB/16GB/32GB*	1GB/2GB/4GB/8GB	512MB/1GB/2GB/4GB
Function	Non-ECC Unbuffered Memory		
Pin Number	260pin	204pin	200pin
Width	64Bits	64Bits	64Bits
Voltage	1.2V	1.5V/1.35V	1.8V
PCB Height	1.18 Inches	1.18 Inches	1.18 Inches
Operating Temperature	0 ~ 85°C	0 ~ 85°C	0 ~ 85°C
Anti-Sulfuration	√	—	—
Value-Added Service (Optional)	Conformal Coating / Side Fill		

32GB\*: The schedule for the 32GB solution by 2Gbx8 IC is dependent on supplier status

Series	Standard Solution	
Module Type	DDR SODIMM	SDRAM SODIMM
Data Rate	333 MT/s, 400 MT/s	100 MT/s, 133 MT/s
Capacity	256MB/512MB/1GB	128MB/256MB/512MB
Function	Non-ECC Unbuffered Memory	
Pin Number	200pin	144pin
Width	64Bits	64Bits
Voltage	2.6V	3.3V
PCB Height	1.25 Inches	1.25 Inches
Operating Temperature	0 ~ 70°C	0 ~ 70°C
Anti-Sulfuration	—	—
Value-Added Service (Optional)	Conformal Coating / Side Fill	

# Server

## Registered DIMM

Registered DIMM modules are designed to ensure data integrity at both the device and system level of the server. In addition, all Innodisk Registered DIMM modules are tested by our exclusive iRAM testing software to ensure stable performance.

Series	Server Solution	
Module Type	DDR4 RDIMM	DDR3 RDIMM
Data Rate	2133 MT/s, 2400 MT/s, 2666 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s
Capacity	4GB/8GB/16GB/32GB**	2GB/4GB/8GB
Function	Registered Memory with ECC	
Pin Number	288pin	240pin
Width	72Bits	72Bits
Voltage	1.2V	1.5V/1.35V
PCB Height	1.23 Inches	1.18 Inches
Operating Temperature	0 ~ 85°C	0 ~ 85°C
Golden finger 30μ"	√	√
Anti-Sulfuration	√ (**With exception of the 32GB module)	—

# Wide Temperature

## Wide Temperature Unbuffered DIMM

Designed for industrial systems, Innodisk's Wide Temperature DRAM modules are the best choice for applications operating in harsh conditions. Our wide temperature modules use industrial-grade SDRAM components with 30u" Gold fingers to ensure that the memory maintains its high-quality signal, even at temperatures as low as -40°C or as high as 85°C.

Series	Wide Temperature Solution	
Module Type	DDR4 WT UDIMM	DDR3 WT UDIMM
Data Rate	2133 MT/s, 2400 MT/s, 2666 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s
Capacity	4GB/8GB/16GB/32GB*	2GB/4GB/8GB
Function	Non-ECC Unbuffered Memory	
Pin Number	288pin	240pin
Width	64Bits	64Bits
Voltage	1.2V	1.5V/1.35V
PCB Height	1.23 Inches	1.18 Inches
Operating Temperature	-40 ~ 85°C	-40 ~ 85°C
Golden finger 30μ"	√	√
Anti-Sulfuration	√	—
Value-Added Service (Optional)	Conformal Coating / Side Fill	

32GB\*: The schedule for the 32GB solution by 2Gbx8 IC is dependent on supplier status

Series	Wide Temperature Solution		
Module Type	DDR4 WT SODIMM	DDR3 WT SODIMM	DDR2 WT SODIMM
Data Rate	2133 MT/s, 2400 MT/s, 2666 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s	533 MT/s, 667 MT/s, 800 MT/s
Capacity	4GB/8GB/16GB/32GB*	2GB/4GB/8GB	1GB/2GB
Function	Non-ECC Unbuffered Memory		
Pin Number	260pin	204pin	200pin
Width	64Bits	64Bits	64Bits
Voltage	1.2V	1.5V/1.35V	1.8V
PCB Height	1.18 Inches	1.18 Inches	1.18 Inches
Operating Temperature	-40 ~ 85°C	-40 ~ 85°C	-40 ~ 85°C
Golden finger 30μ"	✓	✓	✓
Anti-Sulfuration	✓	—	—
Value-Added Service (Optional)	Conformal Coating / Side Fill		

32GB\*: The schedule for the 32GB solution by 2Gbx8 IC is dependent on supplier status

## Wide Temperature Unbuffered DIMM with ECC

Wide Temperature ECC DIMMs are designed for both industrial systems and servers, Innodisk's Wide Temperature DRAM modules are best suited for applications that must work in extreme temperatures. With the ECC function, the Wide Temperature DIMMs also ensure that data is corrected when corrupted data bits are found during data retrieval.

Series	Wide Temperature Solution			
Module Type	DDR4 WT ECC UDIMM	DDR4 WT ECC SODIMM	DDR3 WT ECC UDIMM	DDR3 WT ECC SODIMM
Data Rate	2133 MT/s, 2400 MT/s, 2666 MT/s	2133 MT/s, 2400 MT/s, 2666 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s	1066 MT/s, 1333 MT/s, 1600 MT/s, 1866 MT/s

Golden finger 30μ"	✓	✓
Anti-Sulfuration	✓	✓
Value-Added Service (Optional)	Conformal Coating / Side Fill	

## ECC DIMM

ECC modules are designed to detect and correct single-bit errors that occur during data storage and transmission. ECC modules use Hamming Code or Triple Modular Redundancy for error detection and correction, and manage error corrections on their own, without requesting that the data source resend original data.

Series	ECC Unbuffered DIMM Solution		
Module Type	DDR4 ECC UDIMM	DDR4 ECC SODIMM	DDR4 ECC UDIMM VLP

## Very Low-Profile (VLP) DIMM and Ultra Low-Profile (ULP) DIMM

**Very Low-Profile (VLP) DIMM** modules and **Ultra Low-Profile (ULP) DIMM** modules are specialized for use in 1U systems, such as blade server data centers, where the system height is lower than 1.18 inches. The design of these modules improves air flow inside a compact system and reduces thermal impact.

Series	Very Low-Profile (VLP) Solution

## Mini DIMM

All Mini DIMMs offer high speed, high density, high performance for telecommunication and cloud systems. The 0.72 inch ULP Mini DIMM modules are specifically designed for networking applications. They are compliant with JEDEC standards and are designed to improve airflow and thermal resistance. With the ECC function, the Mini DIMMs also ensure that data is corrected when corrupted data bits are found during data retrieval.

Series	Mini DIMM Solution

## Special / Customized

### XR-DIMM

In order to meet the high standards of the aerospace and defense industry, our XR-DIMM comes equipped with several advantages which will satisfy your expectation for robust DRAM modules. We offer two densities of DDR4 XR-DIMM, 8GB & 16GB, both with an integrated error checking and correction function. With its 300-pin socket connector, Innodisk's XR-DIMM exceeds the pin number standard established by the SFF Special Interest Group (SFF-SIG), ensuring a firm connection between the CPU and DRAM module. This customized design enables XRDIMM to be highly resistant to shock and vibration, providing a more reliable performance for the aerospace and defense vertical market.

Series	XR-DIMM Solutions

Value-Added Service (Optional)	Side Fill			

## Embedded Peripheral Modules

Embedded Peripheral Modules provide LAN, PoE, CANBus, DIO, Serial Port, Storage, RAID and Display functionality to embedded systems. In order to enrich industrial customer's embedded solutions with flexibility at the best TCO (Total Cost of Ownership), we are dedicated to creating expandable, space-efficient expansion modules.

Innodisk is experienced with the most common interface which include PCIe, USB, SATA and is able to provide this functionality in the wide range of space-saving form factors available today. Just like Innodisk's esteemed memory solutions, our Standard PCIe, mPCIe, 2.5" SSD and M.2(NGFF) modules fit perfectly into any industrial system.

# Innodisk Efficient Modular Expansion

When it comes to motherboards, adding additional input/ output ports will often require costly re-design. Innodisk can offer solutions that allow for easily implemented expansions on already existing motherboards, saving the system integrator from costly and time-consuming re-design. In other words, using a standard motherboard as a basis, Innodisk can assist you in creating various products according to different specifications.

Traditional scenario : Standard mother board with different fixed I/O

Innodisk Solution: Standard motherboard with Innodisk Efficient Modular Expansion

## Benefits

1. One motherboard for multiple products
2. Efficient components sharing
3. Accelerate the process of new products to the market
4. Significantly reduce development costs

# Product Categories and I/O Descriptions

Through expansion slots such as PCIe, M.2, mPCIe, SATA and USB pin header Innodisk modules can easily expand to various I/O devices.

## Industrial design

Industrial temperature (-40 °C to 85 °C)

Up to ESD contact 8KV and air 15KV protection

Up to 2.5 KV isolation to prevent damage your system

# Fulfilling the Needs of Various Vertical Markets

## Transportation

Transportation includes interfaces such as Power over Ethernet (PoE), CANbus and LAN. With Innodisk expansion cards, the system integrator can facilitate seamless connectivity and data safety for in-vehicle systems.

## Medical

Medical industrial devices link to a variety of other devices, such as: VOIP phones, web cameras, high quality speakers, MSR and bar code scanners. These devices commonly use USB and serial interfaces. A RAID solution offers strong data integrity for critical applications.

## Automation

Industrial control units using RS422/485 signals to control devices requires solid Ethernet network extensions. HMI devices are used to display important data regarding ongoing operations.

## Retail

Retail industry includes point-of-sales, kiosk and digital signage products. This kind of equipment runs on Serial and USB expansions. In addition, digital signage usually need to support multi-screen, can use Innodisk's display expansion card which supports up to three screens at the same time.

# Communication

Innodisk expansion modules aim to provide flexible connectivity and bandwidth to industrial systems. With our mPCIe GbE LAN, PoE, CANBus and serial communication modules, users can expand the existing system to meet dynamic connectivity under IoT.

## 1-1 CANbus

CANBus (Controller Area Network) is a type of serial communication that is widely used in automation, embedded systems and the automotive industry. Innodisk has developed the EMUC-B202 CANbus expansion card specifically to fulfill these needs. It provides dual-port CAN 2.0B/J1939 connectivity with an isolation design, and supports a wide temperature range in order to enhance system security and reliability.

Based on an inbuilt Linux CDC-ACM, the Innodisk EMUC-B202 uses a custom-made SocketCAN network driver that allows two ports on a single card. Thus, it provides maximum compatibility for customers when developing programs. Other than SocketCAN, Innodisk also provides complete Windows/Linux software API, test utility and sample code for traditional character drivers.

### Complete Software Support

#### API Sample Code

By using GUI or Command base test utility the user can easily verify modules

#### Test Utility

Provides C/C++/C# sample code to speed up program integration

#### Platform Support

API can be used in Windows, Linux and QNX. Other than x86 system, a cross-compiler service for ARM system is also available.

Model Name	EMUC-B202	EGPC-B201
Module Type	USB to dual isolated CANbus 2.0B/J1939 Module	M.2 to dual isolated CANbus 2.0B/J1939 Module
Key Features	1. CANbus 2.0B backward compatible with 2.0A 2. Support baud rate 100/125/250/500(default)/800/1000K 3. Support CAN message acceptance filter 4. Keep configuration after hardware reboot 5. Up to 6000 CAN messages per second (receive data) 6. Support Listen-only mode 7. Additional driver to support Linux SocketCAN 8. Support SAE J1939 high layer protocol (Optional) 9. Termination resistor enabled/disabled by jumper 10. Supports 3rd mounting hole and USB Pin header for out-of-minicard installation 11. Complies with EN61000-4-5 2.5kV Surge protection 12. Complies with IEC 60950-1:2005 + A1: 2009 + A2:2013 2.5kV HiPOT protection 13. Complies with EN61000-4-2 (ESD) Air-15kV, Contact-8kV 14. Industrial temperature -40 °C to 85 °C	1. Alternative M.2 2260 or 2280 B-M key 2. CANbus 2.0B backward compatible with 2.0A 3. Support baud rate 100/125/250/500(default)/800/1000K 4. Support CAN message acceptance filter 5. Keep configuration after hardware reboot 6. Up to 6000 CAN messages per second (receive data) 7. Support Listen-only mode 8. Additional driver to support Linux SocketCAN 9. Support SAE J1939 high layer protocol (Optional) 10. Termination resistor enabled/disabled by jumper 11. Complies with EN61000-4-5 2.5kV Surge protection 12. Complies with IEC 60950-1:2005 + A1: 2009 + A2:2013 2.5kV HiPOT protection 13. Complies with EN61000-4-2 (ESD) Air-15kV, Contact-8kV 14. Industrial temperature -40 °C to 85 °C
Form-Factor	mPCIe	M.2 2260/2280
Input I/F	USB 2.0	PCI Express 2.0
Input Connector	mPCIe or 5Pin Header	M.2 B-M
Output I/F	CANbus 2.0B/J1939 x 2	CANbus 2.0B/J1939 x 2
Output Connector	DB-9 x 2	DB-9 x 2
Dimension (WxLxH/mm)	30 x 50.9 x 6.1	22 x 60 x 6.1 22 x 80 x 6.1
Operating Temperature	Wide temp : -40°~85°C	Wide temp : -40°~85°C
Order Info.	EMUC-B202-W1 (CAN 2.0B) EMUC-B202-W2 (J1939)	EGPC-B201-W1 (2280, CAN2.0B) EGPC-B201-W2 (2280, J1939) EGPC-B201-W3 (2260, CAN2.0B) EGPC-B201-W4 (2260, J1939)

## 1-2 Power over Ethernet (PoE)

The Industrial-grade Power over Ethernet (PoE) series complies with IEEE 802.3af and 802.3at, ensuring reliable power and data transfer. These expansion cards feature isolated, wide temperature design and are certified to withstand HiPOT and surge occurrences, making it the optimal choice for operation in extreme conditions.

### Complete Form factor

- Compact and easily integrated form factors: PCIe / mPCIe / M.2 2280

### Flexible Expansion

- Supports 12~24V power input via internal 4 pin header or external DC Jack
- Supports alternative fixed approach of mounting hole or bracket for daughter board

### Industrial Design

- Supports wide temperature -40° ~ +85°C
- Complies with EN61000-4-2 (ESD) Air up to 15kV, Contact up to 8kV
- Complies with IEC 60950-1:2005 + A1: 2009 + A2:2013 HiPOT protection
- Complies with EN61000-4-5 Surge protection

## 1-3 GbE LAN

mPCIe and M.2 based GbE LAN cards using Intel Ethernet chip provide high performance 10/100/1000 Mbps network connectivity with an isolation design, and supports a wide temperature range in order to enhance system security and reliability. Small form factor with flexible daughter board can be suitable for smaller industrial computer by using alternative terminal mounting hole of bracket.

Model Name	EMPL-G101	EMPL-G201	EMPL-G102	EMPL-G202	EGPL-G101

## 1-4 Serial Port

Various mPCIe-expanded serial cards provide the combination of 2/4/8 ports RS232/RS422/RS485 with PCIe or USB input and ISOLATION/ESD provides efficient system expansions. Software switches that can help switch the serial port RS232/RS422/485 without the need to open system chassis.

Model Name	EMP2-X202	EMP2-X402	EMP2-X203	EMP2-X403

## 1-5 DIO

Digital I/O (Digital Input and Output). Digital Inputs allow a host system to detect logic states, and Digital Outputs allow a host system to output logic states. Innodisk digital input/output expansion cards aim to fulfil the IoT communication needs of industrial systems. We provide API, which supports Windows and Linux as well as test utilities and sample codes. Users can quickly verify the functionality of the card and easily integrate it into their applications.

### The Utility Console

Model Name	EMUI-OD01
Module Type	USB to 32bit Digital I/O Module
Key Features	1. 32bit digital I/O in 4 ports(each port 8bit) 2. Programmable I/O 3. Selectable VCCIO 3.3V or 5V by DIP switch 4. Buffered I/O (Output 5V, 32mA source, 32mA sink) (Output 3.3V, 24mA source, 24mA sink) 5. 4 external interrupts with rising/falling edge on port D 6. Keep configuration after hardware reboot 7. Supports 3rd mounting hole and USB Pin header for out-of-minicard installation 8. Complies with EN61000-4-2 (ESD) Air-15kV, Contact-8kV 9. Industrial temperature(-40 °C to 85 °C) operation
Form-Factor	mPCIe
Input I/F	USB 2.0
Input Connector	mPCIe or 5Pin Header
Output I/F	32bit Digital I/O
Output Connector	40pin 1.25mm (40DP-1.25 ) with DB37 male cable
Dimension (WxLxH/mm)	30 x 50.9 x 8.2
Operating Temperature	Wide temp : -40°~85°C
Order Infomation	EMUI-OD01-W1

# Disk Array

Innodisk provides RAID (Redundant Array of Independent Disks) modules to combine multiple types of embedded flash for the purposes of data redundancy or capacity aggregation.

Model Name	EMSS-32R1	EMPS-32R1	EGSS-32R1
Module Type	mPCIe to dual SATA III RAID module	mPCIe to dual SATA III RAID module	M.2 2242 to SATA RAID module
Key Features	1. Supports SATA to dual SATA III Port Multiplier 2. Supports H/W RAID 0/1 over SATA 3. optional USB 2.0 to dual SATA III 4. Industrial temperature -40 °C to 85 °C	1. PCIe to dual SATA III ports 2. Supports AHCI, Port-Multiplier 3. Supports Hardware RAID 0, RAID1 4. Industrial temperature -40 °C to 85 °C	1. Supports SATA to dual SATA III Port Multiplier 2. Supports H/W RAID 0/1 over SATA 3. Industrial temperature -40 °C to 85 °C
Form-Factor	mSATA	mPCIe	M.2 2242
Input I/F	SATA III	PCI Express 2.0	SATA III
Input Connector	mPCIe	mPCIe	M.2 B-M
Output I/F	SATA III	SATA III	SATA III
Output Connector	SATA 7 Pin x 2	SATA 7 Pin x 2	SATA 7 Pin x 2
Dimension (WxLxH/mm)	29.8 x 50.8 x 11.5	30.0 x 50.9 x 10.7	22.0 x 42.0 x 10.8
Operating Temperature	STD temp : 0°~70°C Wide temp : -40°~85°C	STD temp : 0°~70°C Wide temp : -40°~85°C	STD temp : 0°~70°C Wide temp : -40°~85°C
Order Infomation	EMSS-32R1-C1 EMSS-32R1-W1	EMPS-32R1-C1 EMPS-32R1-W1	EGSS-32R1-C1 EGSS-32R1-W1

Model Name	E2SS-32R1	E2SS-32R2	ELPS-32R1
Module Type	2.5" SSD to dual mSATA RAID module	2.5" SSD to dual M.2 RAID Module	PCIe x4 to dual M.2 RAID Module
Key Features	1. 2.5" SSD to dual mSATA slots 2. Supports SATA III to SATA III port multiplier 3. Supports H/W RAID 0/1 over SATA 4. Excellent data transfer speed	1. 2.5" SSD to dual M.2 slots. 2. Supports M.2 Key-B 2242/2260/2280 3. Supports SATA III to SATA III Port Multiplier. 4. Supports H/W RAID 0/1 over SATA 5. Excellent data transfer speed	1. PCIe x4 to dual M.2 ports. 2. Supports M.2 Key-B 2242/2260/2280/22110 3. Support wide temp 4. Supports AHCI, Port-Multiplier. 5. Supports Native Command Queuing 6. Support Hardware RAID 0, RAID 1
Form-Factor	2.5" SSD	2.5" SSD	Low Profile PCIe
Input I/F	SATA III	SATA III	PCI Express 2.0 x 2
Input Connector	SATA 7+15 Pin	SATA 7+15 Pin	PCIe x4
Output I/F	SATA III	SATA III	SATA III
Output Connector	mSATA x 2	M.2 Key-B x 2	M.2 Key-B x 2
Dimension (WxLxH/mm)	69.85 x 100.1 x 11.0	69.85 x 100.1 x 11.0	130.35 x 68.9 x 12.0
Operating Temperature	STD temp : 0°~70°C	STD temp : 0°~70°C	STD temp : 0°~70°C Wide temp : -40°~85°C
Order Infomation	E2SS-32R1-C1	E2SS-32R2-C1	ELPS-32R1-C1 ELPS-32R1-W1

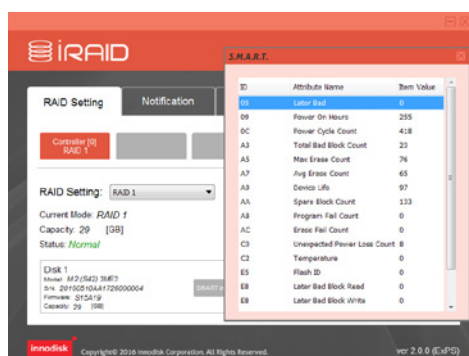

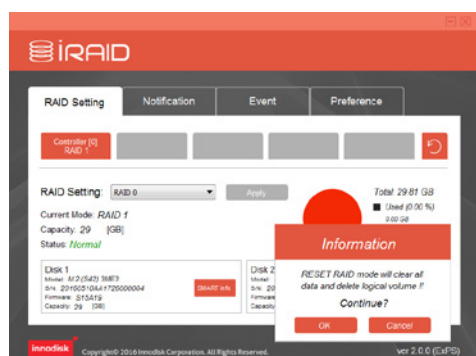

# iRAID

## Simplifying the configuration and management of innodisk's RAID controller

Innodisk's iRAID is a Redundant Array of Independent Disks (RAID) management tool that enables system integrators to configure, monitor, and manage RAID 0 and RAID 1 storage configurations on Solid State Drives (SSDs). When used in combination with innodisk's RAID cards and compatible SSDs, iRAID becomes a powerful monitoring tool that provides detailed Self-Monitoring, and Reporting Technology information (SMART info).

We provide RAID card for embedded flash modules in standard PCIe, 2.5" and minicard form factor, alongside the software "iRAID" dedicated to the management and configuration of RAID volume.

### Features

- Monitor RAID status
- Change RAID mode
- Get S.M.A.R.T information
- Notification by Email
- Supports Windows and Linux

## Display Card

Innodisk's embedded graphic card features a 2D graphic engine and supports resolutions up to 1920x1080. With a fanless design, our mPCIe graphic cards can operate at temperatures ranging from -40°C to 85°C. With support for both Windows and Linux drivers, Innodisk's Display Cards are suitable for a wide variety of industrial platforms.

Model Name	EMPV-1201	EMPV-1202	EGPV-1101
Module Type	mPCIe to dual VGA & HDMI(DVI) module	mPCIe to VGA & 18/24 bit LVDS module	M.2 to HDMI or DVI & Single/Dual Channel LVDS Module
Key Features	<ol style="list-style-type: none"> <li>1. mPCIe to dual VGA &amp; HDMI Graphic Card.</li> <li>2. VGA Output: 1920x1080, up to 75Hz vertical rate.</li> <li>3. HDMI/DVI up to 1080p, Ultra low power consumption.</li> <li>4. Optional VGA/HDMI/DVI cable</li> <li>5. 90°, 180° and 270° rotation of on-screen images</li> <li>6. Output I/F	USB 2.0, SATA III(frontside) SATA II(backside)	USB 2.0, SATA III(frontside) PCI Express 1.0(backside)	PCI Express 2.0	PCI Express 3.0	PCI Express , USB 2.0	PCI Express , USB 2.0, SATA
Output Connector	mSATA x 2 (Front and Back) M.2 x 1(2242/2260/2280)	mPCIe x 1(backside), mSATA x 1 M.2 x 1(2242/2260/2280)	mPCIe x 1	M.2 Key-M	M.2 Key-A-E	M.2 Key B
Dimensions(W*L*H/mm)	110.0 x 68.9 x 12.3	110.0 x 68.9 x 12.3	72.1 x 68.9 x 10.2	143.3 x 68.9 x 5.65	30 x 54.4 x 8.15	30 x 54.4 x 6.4
Operating Temperature	STD temp : 0°~70°C	STD temp : 0°~70°C	STD temp : 0°~70°C	Wide temp : -40°~85°C	Wide temp : -40°~85°C	Wide temp : -40°~85°C
Order Infomation	ESXS-2301-C1	ESXS-2302-C1	ELPP-0101-C2	ELPP-0102-W1	EMXX-0101-W1 (M.2 Key-A) EMXX-0101-W2 (M.2 Key-E)	EMXX-0101-W1 EMXX-0101-W2 (SIM slot included)

## Product Overview

Form Factor			Output								
			PCIe	SATA	PATA	USB	POE	VGA Display	LAN	CAN BUS DIO	Serial 232/422..
mPCIe (mSATA)	Input	PCIe		EMPS-3401 EMPS-3201 EMPS-32R1		EMPU-3401 EMPU-3201	EMPL-G2P1 EMPL-G2P2	EMPV-1201 EMPV-1202	EMPL-G101 EMPL-G201 EMPL-G102 EMPL-G201 EMPL-G103 EMPL-G203		EMP2-X801 EMP2-X402 EMP2-X403 EMP2-X404 EMP2-X4S1 EMP2-X4S2
		SATA		EMSS-32R1							
		USB								EMU1-0D01 EMUC-B202	EMU2-X1S1 EMU2-X1S2
PCIe Standard	Input	PCIe		ESPS-3401 ELPS-3201 ELPS-32R1			ELPS-32R1				
		SATA									
		USB									
M.2 (NGFF)	Input	PCIe		EGPS-3401			EGPL-G2P1	EGPV-1101	EGPL-G101 EGPL-G201 EGPL-G102 EGPL-G202	EGPC-B201	EGP2-X401
		SATA		EGSS-32R1							
		USB									
2.5"	Input	SATA		E2SS-32R1 E2SS-32R2							
		PATA									

## Absolute Integration™

Absolute Integration™ is our envisioned path that moves toward a more interconnected world.

“To us, integration is not merely the combination of hardware, software and firmware; it is a philosophy that assimilates all relevant elements to create an optimal solution.”

### Headquarters

#### Innodisk Corporation

5F., No.237, Sec. 1, Datong Rd., Xizhi Dist.,  
New Taipei City, 221, Taiwan

**T** +886-2-7703-3000

**F** +886-2-7703-3555

**E** sales@innodisk.com

### Branch Offices

#### Japan

2F., 1-1-14, Nihonbashi-Ningyocho,  
Chuo-ku, Tokyo, 103-0013 Japan

**T** +81-3-6667-0161

**F** +81-3-6667-0162

**E** jpsales@innodisk.com

#### Europe

Pisanostraat 57, 5623 CB,  
Eindhoven, The Netherlands

**T** +31-(0)40 3045 400

**F** +31-(0)40 3045 419
